EDUCATION

Virginia Tech

Bachelor of Science in Computer Science, Minor in HCI and Math

Blacksburg, VA

Expected May 2026

- GPA: 3.63/4.0 | Dean's List: Fall 2023, Fall 2024, Spring 2025, and Fall 2025
- Coursework: HCI, Cloud Dev, GUI Programming, Data Structures and Algorithms, Mobile Dev, Intro to AI

EXPERIENCE

Undergraduate Research Assistant

Virginia Tech - DBWorkout

October 2025 – Present

Blacksburg, VA

- Contributed to SQL practice platform with focus on feedback, usability, and classroom workflows
- Improved database schema and filtering logic for instructor tools

Undergraduate Research Intern

Queen Mary University of London - CIS Lab

July 2025 – Aug 2025

London, United Kingdom

- Built a multimodal evaluation pipeline integrating LISA (segmentation), DAM (captioning), and a LLaMA-based critic to assess spatial (IoU) and semantic similarity
- Developed an interactive Gradio interface to visualize model outputs, compare predictions with targets, and generate feedback for prompt refinement

Undergraduate Teaching Assistant

Virginia Tech

Aug 2025 – Present

Blacksburg, VA

- Assisted Intro to Software Design (CS1114) course students in weekly lab sessions and office hours, guiding students through Java programming
- Held office hours for a course of 400+ students to assist with assignments and concept clarification

Korean Student Association at VT (VTKSA)

Virginia Tech

Jan 2025 – Present

Blacksburg, VA

- Lead club operations, coordinate events, and manage communications for the student community as Vice President
- Managed the club website and maintained a job board to support Korean international students as Webmaster

PROJECTS

DBWorkout | *Python, React, PostgreSQL*

Oct 2025 – Present

- Contributed to the development of a web-based SQL practice platform supporting real-time feedback and instructor-led sessions
- Focused on improving backend data models and implementing filterable views to support scalable question and session management

LLM-Guided Segmentation Assessment | *Python, Gradio*

July 2025 – Aug 2025

- Developed an end-to-end multimodal evaluation pipeline integrating LISA (segmentation), DAM (captioning), and a LLaMA-based critic to assess spatial (IoU) and semantic similarity
- Built an interactive Gradio interface to visualize segmentation results, compare predictions with targets, compute similarity scores, and generate feedback for prompt refinement

Event Tracker | *Swift, SwiftData, MapKit, TicketMaster API*

- Implemented core data architecture using SwiftData, including database classes, event and artist models, and initial content setup
- Developed artist tracking and map features to show events geographically, including "Events on Map" UI and venue-based filtering

Feather Finder | *Java, HTML/CSS, AWS EC2*

- Built a birdwatching web app with sighting logging and map integration using eBird and Google Maps APIs
- Designed backend schema, deployed on AWS EC2, and collaborated in a 6-person team

TECHNICAL SKILLS

Languages: Java, Python, C, Swift, JavaScript, HTML/CSS, SQL

Frameworks/Tools: React, Node.js, PostgreSQL, Git, Docker, AWS EC2

Other: Korean (Native), English (Fluent)
